Full Stack
Jan 2026 - Present
udemy, Virtual

I completed an online Full Stack Web Development course on Udemy, where I gained hands-on experience in building dynamic and responsive web applications. During the course, I developed strong skills in both frontend and backend technologies. I worked with HTML, CSS, and JavaScript to design interactive user interfaces and learned modern frameworks to enhance user experience. On the backend, I explored server-side development using technologies like Node.js and handled database management with SQL and MongoDB.

The course included real-world projects, which helped me understand the complete development lifecycle—from designing and coding to testing and deployment. I also gained practical knowledge of version control using Git, API integration, and basic web security practices.

This experience improved my problem-solving skills and strengthened my ability to build full-stack applications efficiently, preparing me for real-world development roles.
